

Aftercare Instructions

If you're experiencing a medical emergency please call 911 or go to the nearest hospital or medical facility.

Option 1: Plastic Wrap / Saniderm Bandage:

- Leave the bandage on for at least an hour. (If using Saniderm, it can be left on for up to two days)
- Remove bandage and wash with an unscented mild antibacterial soap and warm water.
- Gently dry (pat) with a paper towel and apply a small amount of Aquaphor / A&D ointment.
- Apply the ointment twice a day for the first three days.
- On the third day, switch to an unscented lotion (like Lubriderm) and use as needed for the remainder of the healing process.

Option 2: Spray-On Bandage:

- The spray-on bandage will naturally flake off over time with very little need to tend.
- Once the spray on bandage has come off, use an unscented lotion (like Lubriderm) and use as needed for the remainder of the healing process.

Aftercare Do Nots:

- DO NOT submerge your tattoo in bodies of water. This includes: Swimming pools, hot tubs, lakes, the ocean, or bath tubs.
- DO NOT put your tattoo in direct sunlight. Wear clothing that will cover it
- DO NOT pick or scratch your tattoo.

Healing Time:

Dry cracking, peeling, scabbing is normal for fresh tattoos. Tattoos can take up to one month to fully heal.
